Drawings

1. The drawings have been approved.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fischer et al (6224017).

See col 3 lines 15-22.

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gillingham et al (5743490) in view of Fischer et al.

Gillingham et al shows all the details of the shafts and actuators and motors and sensors but does not have the details of the operation of the brake. It would have been obvious to one having ordinary skill in the art at the time the invention was made to operate the brake of Gillingham et al as taught by Fischer et al (6224017) since it will avoid over stressing of aerodynamic forces on the returning flap. Disc and drum brakes are known equivalents.

Art Unit: 3644

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
